LAWN STARTER FERTILIZER

STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

DIRECTIONS FOR USE

WHAT THIS PRODUCT DOES

STA-GREEN® Lawn Starter Fertilizer is specially formulated for starting new lawns from seed or sod. The high phosphorus level promotes strong root development and winter hardiness. Grass well supplied with phosphorus is less likely to become diseased.

WHEN TO APPLY

STA-GREEN® Lawn Starter Fertilizer may be used any time of the year. For best results when planting a new lawn or overseeding an existing lawn, apply in the spring or fall, when temperatures are above 50° F and below 90° F.

HOW TO APPLY

STARTING A NEW LAWN FROM SEED
For new lawns, broadcast STA-GREEN® Lawn Starter Fertilizer uniformly over the soil using one bag per 14,000 sq ft (refer to spreader settings). Lightly rake fertilizer into the soil 1/4 inch to 1/8 inch deep. Plant your seed following packaging directions and water regularly until the lawn is established. In Florida, use only one bag per 14,000 sq ft per year.

RESEEDING AN EXISTING LAWN
When reseeding, overseeding or repairing bare spots, apply to planting area using one bag per 14,000 sq ft (refer to spreader settings). Water thoroughly after applying. In Florida, use only one bag per 14,000 sq ft per year.

SODDING
When sodding, apply to planting area using one bag per 14,000 sq ft (refer to spreader settings). In Florida, use only one bag per 14,000 sq ft per year.

SPREADER CALIBRATION

NOTE: The spreader settings listed are approximate. It is important to check calibration of spreader frequently to ensure it is functioning properly and applying product evenly. To check calibration, accurately weigh a few pounds into the spreader and apply to a measured area. Then adjust spreader setting, if necessary, in order to ensure correct rate of application.

IMPORTANT: Always use the recommended setting for your spreader for this particular product, as overapplication may cause injury to your lawn.

Spreader settings listed are approximate. Differences may occur due to condition of spreader, speed at which applied and roughness of area treated. Be sure to calibrate spreader before beginning, adjusting if necessary. Consult owner's manual for further information.

NOTE: We recommend that you keep this product (and all other fertilizers) out of reach of children and pets. This product may be harmful if swallowed and may cause skin and eye irritation. Avoid breathing dust and contact with skin and eyes. Wash skin with soap and water after handling. If in eyes, rinse eyes with water for 15 minutes and repeat if necessary.
This product may stain sidewalks, driveways and other concrete surfaces. Sweep off any product that may have drifted onto these areas and take caution when applying near pools.
Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk or street back onto your lawn.
When applied as directed, this product meets the guidelines for metals adopted by the Association of American Plant Food Controls Officials. Information regarding the contents and levels of metals in this product is available on the Internet at http://www.aapfco.org/metals.htm

†MONEY BACK GUARANTEE
If you are not completely satisfied with this product, please mail your name, address and proof of purchase (package UPC) and a brief explanation for seeking a refund.

This fertilizer contains phosphorus and may not be used on turf in the sate of Maryland except when cl Providing nutrients to specific soils and target vegetation as determined to be necessary in accordance with a soil test that was conducted by a laboratory identified under § 8-803.1 of the Agriculture Article, Annotated Code of Maryland, performed no more than 3 years before the application; cl Establishing vegetation for the first time, such as after land disturbance, provided the application is conducted in accordance with the recommended application rates established by the State; or jl Revitalishing or repairing a turf area.

LIMITED WARRANTY AND DISCLAIMER

If these terms are not acceptable, return this product unopened immediately to the point of purchase, and the purchase price will be refunded in full. The terms of this Limited Warranty and Disclaimer cannot be varied by any written or verbal statements or agreements at the point of sale or elsewhere.

INSTRUCCIONES DE USO

QUÉ HACE ESTE PRODUCTO El fertilizante de brote para césped STA-GREEN® está especialmente formulado para empezar nuevos céspedes a partir de semillas o tepe. Los altos niveles de fósforo estimulan el desarrollo de raíces fuertes y la resistencia al invierno. Es menos probable que el césped que contiene buenas cantidades de fósforo sufra daños.

CUÁNDO APLICAR El fertilizante de brote para césped STA-GREEN® se puede usar en cualquier momento del año. Para obtener mejores resultados al plantar un césped nuevo o para volver a sembrar en un césped existente, aplíquelo en la primavera o el otoño, cuando las temperaturas están por encima de los 10 °C y por debajo de los 32,2 °C.

CÓMO APLICAR Es una violación a la Ley Federal utilizar este producto de manera contraria a lo indicado en la etiqueta.

CÓMO PLANTAR UN CÉSPED NUEVO A PARTIR DE SEMILLAS
Para céspedes nuevos, esparza el fertilizante de brote para césped STA-GREEN® de manera uniforme sobre la superficie del suelo utilizando una bolsa por cada 1300,64 m² (consulte las graduaciones del esparcidor). Rastrille suavemente el fertilizante en el suelo de 0,64 cm a 0,32 cm. Plante las semillas siguiendo las instrucciones del paquete y riegue regularmente hasta que el césped se haya arraigado. En Florida, use solo una bolsa por cada 1301,64 m² al año.

CUANDO VUELVE A SEMBRAR EN UN CÉSPED EXISTENTE
Cuando vuelva a sembrar, aplicar semillas varias veces o reparar espacios vacíos, aplique el producto en el área de plantación, usando una bolsa por cada 1301,64 m² (consulte las graduaciones del esparcidor). Riegue bien después de aplicar. En Florida, use solo una bolsa por cada 1301,64 m² al año.

CUANDO CUBRA DE CÉSPED Cuando cubra de césped, aplique una bolsa del producto en el área de plantación por cada 1301,64 m² (consulte las graduaciones del esparcidor). En Florida, use solo una bolsa por cada 1301,64 m² al año.

CALIBRACIÓN DE ESPARCIDORES
NOTA: Las graduaciones del esparcidor que se mencionan son aproximadas. Es importante verificar con frecuencia la calibración del esparcidor para garantizar que funcione correctamente y que el producto se aplique de forma pareja. Para verificar la calibración, pese con precisión algunas cuantas gramos en el esparcidor y aplique en un área medida. Luego ajuste el esparcidor si es necesario para asegurar la dosis correcta de aplicación.
IMPORTANTE: Use siempre la graduación recomendada del esparcidor para este producto en especial, ya que aplicar más de lo debido puede dañar el césped. Las graduaciones del esparcidor que se mencionan son aproximadas. Se pueden producir diferencias debido al estado del esparcidor, la velocidad con la que se aplica y la escabrosidad del área tratada. Asegúrese de calibrar el esparcidor antes de comenzar y haga ajustes de ser necesario. Consulte el manual del propietario para obtener más información.

FOR A BEAUTIFUL STA-GREEN® LAWN

A good fertilization program can keep your lawn green and vigorous. STA-GREEN® has a wide selection of fertilizers to help you throughout the year. *Un buen programa de fertilización puede mantener su césped verde y vigoroso. STA-GREEN® cuenta con una amplia selección de fertilizantes para brindarle ayuda durante todo el año.*
